Matcrete **DUSTONE COLOR HARDENER** is an intergrind of color pigments, cement graded, hard non-reactive aggregates and surface conditioning agents. Only pure light fast, lime proof and weather resistant pigments are used. Dustone Color Hardener is a ready to use dry shake colorant and hardener for concrete. Applied to fresh concrete, it will produce a colorful, wear resistant concrete surface. Dustone Color Hardener is specifically formulated for use in textured/stamped concrete. Its superior concrete stamping and coloring characteristics make it ideal for use on many different commercial and residential colored concrete finishes. Available in 63 pound units.

Matcrete **ANTIQUÉ RELEASE AGENT** is a very fine colored powder formulated for use in the texture stamping of concrete. Antique Release Agent enhances the texturing mats ability to reproduce the fine details of stone, slate, wood, etc. in concrete by forming a dry interface between the fresh concrete and the texturing mats during installation and imparting color shading to the final surface finish. Available in 33 pound units.

Matcrete **LIQUID RELEASE AGENT** is a colorless bond breaker designed to keep texturing mats from sticking to still-plastic concrete or cementitious overlayments. Liquid Release Agent forms a lubricating barrier that prolongs the life of texturing mats by decreasing the friction between the texturing mat and the concrete or overlayment. Liquid Release Agent requires minimal cleanup and it's bubble gum scent makes it easy to use for both indoor and outdoor applications. Available in 1/5/55 gallon units.

---

Matcrete **CONSEAL** is a fast curing, deep penetrating, non-film forming sealer for porous above ground masonry surfaces. ConSeal is not recommended for basements or pools. Available in 1/5/55 gallon units.

Matcrete **DIAMOND SEAL PLUS** Solvent-Based Sealer is a premium clear high-solids sealer that protects porous masonry surfaces from stains and mildew. Designed to leave a matte finish and be slip-resistant, Diamond Seal Plus is ideal around properly prepared pool decks and areas where water or moisture can accumulate. Diamond Seal Plus will darken the porous masonry surface; thereby, allowing the treated surface to appear damp. Available in 1/5/55 gallon units.

Matcrete **DIAMOND SEAL** Solvent-Based Sealer is a high-performance clear sealer manufactured specifically for porous masonry surfaces such as stamped concrete, exposed concrete, brick, slate, sautillo tile, manufactured stone, and other various porous masonry surfaces. Diamond Seal is suitable for exterior applications where a deep penetrating, non-yellowing, high gloss appearance is needed. Diamond Seal will protect from stains and retard efflorescence of most cured masonry surfaces. Diamond Seal will darken the porous masonry surface; thereby, allowing the treated surface to appear damp. Available in 1/5/55 gallon units.

Matcrete **AQUA SEAL** Water-Based Sealer is a high performance acrylic floor coating formulated to improve and protect the beauty of various porous surfaces. It's durable low luster finish will seal concrete porches, patios, decks and walkways. Aqua Seal can be used to enhance and protect new or aged concrete walking surfaces; thereby providing a deep-penetrating, scuff resistant finish. Aqua Seal is not recommended for concrete garage floors or other surfaces where vehicles are parked. Available in 1/5/55 gallon units.

Matcrete **DIAMOND FINISH** Maintenance Wax is a high performance interior/exterior acrylic polish manufactured specifically for maintaining previously sealed masonry surfaces. Diamond Finish is formulated to enhance and provide for additional scuff resistance and protection to the pre-sealed surface. Diamond Finish will add exceptional resistance to dirt retention. Sealed surfaces periodically maintained with Diamond Finish, will retain their original sealed appearance longer. Diamond Finish is not recommended concrete garage floors or other surfaces where vehicles are parked. Available in 1/5/55 gallon units.

---

Matcrete **RHINO GRIP** Slip-Resistant Additive is a micronized polymer. Rhino Grip creates a textured surface that wears longer and is easy to walk on without irritating sharp edges. Rhino Grip puts "bite" on concrete surfaces and is ideal around properly prepared pool decks and areas where water or moisture can accumulate. The lightweight, clear spheres suspend easily in solvent-based coatings such as Matcrete Diamond Seal. Available in 4 ounce/1 pound/100 pound units.

Matcrete **FLAT LOOK** Gloss-Adjusting Additive is a micronized polymer. Flat Look will reduce the sheen of any solvent-based sealer from glossy to matte finish. Available in 4 ounce/1 pound/100 pound units.
